Welcome to the game “Something Is Wrong About This Christmas.” In this game, you enter a Christmas party as a guest. Along with you, five other guests are present on the map shown at the end of the pitch. However, one of these guests is the killer. The guests move randomly throughout the map, wandering from one room to another. The list of guest names is as follows: Annabel, Zoe, Sebastian, Patrick, and Mondo, and each one is represented by the first letter of their name on the map. According to the map, you can move from the Hall (the only place where neither the guests nor the killer enter) to Bedroom 1, Bedroom 2, or the Main Hall. From the Main Hall, you can also enter the Restroom. Each room has its own specific capacity: • Bedrooms 1 and 2: 3 guests + the player • Main Hall: 4 guests + the player • Restroom: 2 guests + the player The killer moves around the map together with the other guests, but they can only kill someone (other than the player) when they are alone with that person in a room. If the killer murders someone, the victim’s body is shown as an “X” in the room where the murder happened. As the player, you must search the rooms of this house and track the movement of the guests to uncover the truth behind this cursed party. You win only by correctly identifying the killer. After encountering a body, you have two choices: • Make a guess, or • Save your guess for later But be careful: you only have two chances to guess. After that, if you’re wrong, you will become the next victim. You must think fast, because if the killer manages to murder three guests, you lose. As for the inspiration behind this game, I have always loved horror and mystery games. This project combines elements from Among Us, Five Nights at Freddy’s, and Spy Party, which together sparked the idea for this game. This game gives the player a sense of mystery, tension, and a slightly frightening atmosphere wrapped inside a dark Christmas vibe. I intended to create a chill and enjoyable party for the player — but think very carefully before entering, because once you walk in, there is no way out.
